Accounting Made Easy With Phones

Express News Service

Bangalore: There are many options available for today's smartphone users, from being able to finish banking transactions on their phones to carrying on complicated forum discussions. Smartphone users are an increasingly pampered lot. Whether it be Android or iOS, options like email, facebook and talk have become old news for the users who are increasingly adopting faster methods to get work done on the move.

"After spending a few years in M Commerce-based applications, we are now focusing on solutions for commercial usage. Juno is one of our products that offers anytime access," said CEO of 3P Technologies Shourabh

Shrivastav.

Juno aims to integrate Tally account information with the mobile phone and provides facilities to track customers and also get real-time information on high profit margin items with analytics.

"All you need is a Tally.net

JUNO IS COMPATIBLE WITH ANDROID DEVICES AND IS AWAITING APPLE APP STORE APPROVAL – Shourabh Shrivastav, CEO, 3P Technologies

ID and Tally ERP 9. Juno is compatible with Android devices and is awaiting Apple App Store approval," he said.

"We are also coming out with an application which will allow users to collect

data on installed pumpsets. We use radio and infrared technology," said Head of Marketing for Grundfos Pumps India Ramanan.

The company has come out with an mobile app which allows for live pump data feeds and guidance as well as a catalogue of products. "The

objective is to put all data that can be gathered into the customers hands," said MD of Grundfos Pumps India Ranganath.

Also getting onto the app bandwagon is Mouthshut.com the online services re-

view site who are coming out with a mobile app of their own in order to get swifter reviews.

"Some product categories such as feedback on eating out experience is very timely. Say you have a great experience with a restaurant. By the time you reach home and blog or review it from a desktop, your excitement has faded. Mouthshut.com mobile version will let you talk about it while you are still at the restaurant," said CEO of Mouthshut.com Naisal Farooqui.

The mobile app by Mouthshut.com will offer all features that the normal website does and will also in the future have a way for companies who have been reviewed to answer to complaints according to Farooqui.
